Infrastructure

Hardware

- We have latest configured PC for graphics design and image editing solutions.
- We have 20 Windows desktop. We have Cumulative Licensing Program (CLP) for all of our PCs.
- To secure image and information to leak, all of our PC connections are protected by firewall. USB flush or DVD drive using to any computer is strictly restricted.

IT Facilities

Software

We have customized Photoshop QC Tool, which checks and resolves the following issues:

1. Extra path (the software will detect and mark any extra path by a red circle).
2. Open path (the software will detect and mark any open path by a red circle).
3. Extra/Unwanted anchor point (the software will detect any extra /unwanted anchor point and mark it by a red circle).
4. Out of canvas anchor point/open path - detects and gives x/y axis value to find the point.

Advantages of Our team

- Scalable and Flexible Production Capacity
- Highly professional graphic designers and manipulators that understand customer tastes.
- Ability to work around the clock and ensure 24/7 production,
- Provide the best quality at the rock bottom price, without compromising the quality.
- 24 hours standard turnaround time.
- All finished jobs are re-checked and pass strict quality control parameters before delivery.
- OGL maintains prompt communication with the clients. Average email responding time is 10 minutes
- Strict confidentiality is maintained regarding any client related issue.
